

for authors
WEBSITE DESIGN: OPTION A

\$2,000

timeline: 3 weeks

For the published book author looking for an introductory online presence. A website design customized to include your unique information + published work.

Utilizing a pre-designed template within the **WordPress** platform, your website will present a combination of text + images that represent you as an author—your published work, biography, upcoming event information, and a page with contact details.

PROCESS:

We'll begin your project by collecting the content available to populate the pages within your website. This includes all applicable text, photography, and book cover(s) artwork.

Your author website design will include 5 primary pages:

HOME

BOOKS (up to 5 books with accompanying page summaries)

ABOUT

EVENTS (up to 5 events with details)

CONTACT

Once formatted, I'll present a complete preview of your website within a space online that shows live display and functionality so that you have a full understanding of what to expect with the finalized website design.

We'll collaborate through two revision stages ensuring that all display + content adheres to your direction. Following, I'll add link integration to social media accounts (Facebook, Instagram, etc.) and action scripts customized for online contact forms.

A final review will make sure you're completely satisfied with the new website before we schedule the official launch date.

ALL PROJECTS INCLUDE:

Assistance to ensure you're working with the best possible Website Host, current registration with your domain (url address), and WordPress installation.

I can help establish custom email accounts that match your website address and offer suggestions to promote security and Google recognition.

Upon completion, I'll provide an option to subscribe to an ongoing Web Care maintenance plan to ensure your website stays current, secure and updated online.

DELIVERABLES INCLUDE:

WordPress Pre-designed Website Template

Population of site content for included pages

(More website pages can be added for an additional fee.)
